

**Tower Press Belts 塔式压滤机滤带 Vertical Tower Press Belts 立式塔式压滤带**

Our Tower Press Belts provide reliable filtration solutions for a variety of industries — from the pigment, dye and chemical fields to mineral, pharmaceutical and food applications. 我们的塔式压榨带为各种行业提供可靠的过滤解决方案，从颜料、染料和化学领域到矿物、制药和食品应用。

These belts are manufactured from polypropylene/polyester materials and designed with varying weave patterns and yarn types to optimize filtration efficiency, cake moisture and filtrate clarity on all makes of 1.05 and 1.7 machines. Their sealed, reinforced edges and clipper seams guarantee stable, durable performance and exceptionally dry solids (from coarse to fine grades). 这些带由聚丙烯/聚酯材料制成，设计有不同的编织图案和纱线类型，以优化 1.05 和 1.7 型号机器的过滤效率、滤饼水分和滤液透明度。其密封、加固的边缘和快刀接缝保证了稳定、耐用的性能和异常干燥的固体（从粗到细）。

Extremely robust and mechanically stable belts guarantee resistance to abrasion and chemical attack on all machine types and models.

极其健壮和机械稳定腰带保证抵抗磨损和化学袭击所有机器类型和模型。

Our products help to simplify solids handling and reduce transport, maintenance and consumable costs in wide ranging applications. 我们的产品帮助简化固体处理和减少运输、维护成本和可消费的广泛应用。

Our Tower Press Belts offer a number of benefits, including: 我们的塔式压榨带具有许多优点，包括

**Key Features and Benefits**

- Increased plant productivity 提高工厂生产率
- Lower maintenance costs 降低维护成本
- Lower percentage of solids in filtrate 降低滤液中的固含。
- • Increased plant productivity 增加工厂的产能。
  - • Optimised Throughput & Clarity 优化生产力&清晰度
  - Excellent cake release and resistance to blinding 优秀的滤饼卸饼和细颗粒抗阻力
  - Stretch, Shrink & Abrasion Resistant 拉伸、收缩和磨损性能

**Advantages of the Vertical Tower Press 立式塔式压力机的优点**

Compared to a conventional filter press, tower presses have a smaller footprint 与传统压滤机相比，塔式压滤机占地面积更小

Tower presses automatically discharge sticky filter cakes cleanly meaning lower machine maintenance 塔式压滤机自动干净地排放粘性滤饼，意味着机器维护成本更低

Effective cake washing with minimum use of wash liquor and the ability to wash both sides of the fabric 有效的洗饼用最少的洗涤液和洗涤织物两面的能力

**苏州玛柯特环保科技有限公司 Suzhou Markert Environmental Protection & Technical Co.,Ltd**

No.36.Guangling Rd, ,Zheng yi Town. Kun shan county. Suzhou City 215122 Jiangsu, Province .China  
江苏省苏州市昆山市正仪镇广陵路 36 号 office:苏州工业园区唯亭镇青苑五区 11 幢

Typically has a shorter cycle time than convential filter presses 通常，其循环时间比传统压滤机短

Markert belts are valued by end-users and OEMs running these tower presses:我们的传送带受到运行这些塔式压榨机的最终用户和原始设备制造商的重视:

Filtra Systems	菲欧特 系统
FLSmidth (Pnuema Press)	史密斯 (普纽玛压滤)
Outotec (Larox, Hoesch)	奥图泰 (拉鲁克斯, 郝舍)
Progress	进展 (普罗雷格斯)
